## Updating of OSG Sustainability Website

OSG Corporation is pleased to announce the release of its newly revamped website, designed with a fresh look and user-friendly navigation, allowing stakeholders to access detailed sustainability-related information on multiple platforms and devices.

A message from the President and a list of sustainability-related news have been newly added, and ESG-related topics are displayed on the top page as a table of contents for easy searching. We have also added new content, such as PDF links to the dialogue between the Chairman and Outside Directors and the Young Employees Roundtable Discussion, both of which are included in the Integrated Report 2022, on the top page.

OSG will be constantly updating its content with helpful information to make it more user-friendly for our stakeholders.
