Received a "B" Score in CDP Climate Change 2022

OSG Corporation is pleased to announce that it received a "B" score in the CDP Climate Change Report 2022 published by CDP, a non-governmental organization (NGO) that evaluates and discloses the environmental efforts of companies and other entities internationally.

CDP is a not-for-profit charity that runs the global disclosure system for investors, companies, cities, states and regions to manage their environmental impacts. The CDP Climate Change Report 2022 has eight levels of evaluation (A, A-, B, B-, C, C-, D, D-). A score of "B" or "B-" is considered management level and indicates that the company "demonstrates that it is taking action to address environmental risks and impacts" and "is tracking, mitigating, or eliminating environmental risks and impacts. The "B" score is also higher than the average "C" score for the machinery industry and the Asian region.

We regard addressing sustainability, including addressing climate change, as a key management issue, and aim to contribute to the realization of a sustainable society and enhance our corporate value through a variety of initiatives, including reducing CO2 emissions, using renewable energy, and developing environmentally friendly products.
